

React Project Manager

Working with Components, States, Styling, Refs & Portals

- Build a “Project Management” Web App
- Build, Style, Configure & Re-use **Components**
- Manage **State**
- Access DOM Elements & Browser APIs with **Refs**
- Manage JSX Rendering Positions with **Portals**
- If you want to follow along, and you’re interested in exploring Tailwind CSS in greater depth, the official docs are a great place to learn more.
